

# FREE WATER CHECK!

Want a customized irrigation schedule for your landscape? Want to know what type of soil you have and how to make your irrigation system more efficient? Get a free water check and you will learn how to efficiently water your landscape so you can have an attractive landscape while saving water and money!

A water check is a series of tests done in your yard performed to determine how much water your irrigation system is putting out (precipitation rate), the infiltration of water into the soil, and the distribution uniformity (evenness of the application of water). A Weber Basin Water employee will conduct the irrigation tests and also check your soil type, turf root depth and sprinkler pressure. The entire process takes about one hour and the homeowner is left with a customized irrigation schedule and recommendations to improve irrigation.

The Water Check Program is a **FREE** service and is offered from June through August. To schedule an appointment in Davis & Weber Counties call **801 -771-1677**.
