A MESSAGE FROM THE DAVIS & WEBER COUNTIES CANAL COMPANY

The past two water seasons have been challenging with extreme/exceptional drought designations. The current water year has been a mixed bag in the sense of some good storms one month, then very little the next. The current snowpack is near average, but more is needed due to the low reservoir storage. We hope Mother Nature will bring much more snow and precipitation to the mountains and the valley as we gear up for another water season. If not, we may have water restrictions and could end the water season early (often Oct. 1 in drought situations).

We continue to encourage efficient use of the water and to conserve where possible. Please adjust your watering based on the weather. Please strive to only water your yard based on its 'need'. The State website (<http://www.conservewater.utah.gov/>) states "the typical Utah household will use twice as much water outside as necessary." We encourage all users to reference the State website for their weekly watering guide. The State has also updated their regional conservation goals (<https://water.utah.gov/regional-conservation-goals/>). If you are interested in getting a rebate for smart controllers and other water efficient fixtures, see <https://utahwatersavers.com/>. The State requires meters on all new secondary water services and we have begun to retrofit existing services with meters. We are sending water use reports to those with meters in an effort to better educate the end user and better manage our limited water resources. Please contact us (meters@davisweber.org) and provide an email address so the report can be sent to you monthly.

Thank you in advance for your wise water use efforts this upcoming water season, we want to continue the state ethic of efficiently using water in a wise manner. Check our website, www.davisweber.org, for further updates or restrictions. Remember to ensure your system is secure and ready for service by March 28th prior to us pressurizing the system (pressurizing the system may be delayed depending on water supply). Often there is no need to water until May.

National Poison Prevention Week is March 20-26, 2022. Please take the time to inspect your home for any medicines or household products, such as detergents, cleaning products, pesticides, and fertilizers that may not be stored properly and correct the situation immediately. Always store medicines and household products out of the sight of children. Call 1-800-222-1222 for any poison-related questions.
